Written statement, short description of the project in English, no more than 250 words	
This project aimed at creating a route full of activities linking the railway station (in the northern part of the plan) with a cultural	
point (in the south) and which is also the eastern access to the city of Jilava. The route consists of two office buildings, a market,	
dining space, awaiting space, a hobby field, a motel area with parking facilities for motorway users, two hotels a football field, space	
exhibition and an outdoor theater. All of this has been merged into this route to have as many activities as possible to support each	
other for a balanced system. The idea came from a riverbed ,how the movement is and the way it shaped the landscape. The idea of	
flow and constant for both passers-by and for those who are stationed in arranged space. Everything has the purpose of supporting	
the user through forms and movement. All elements are components of an activity space that guides the user to the destination.
