TECHNICAL DOSSIER

Title of the project Tao follows nature: Tianchi Lake Park Planning and Design
Authors Liu min,Zhou yu,He Jiaxi,Tao shuai
Title of the course Landscape Plan and Design
Academic year 2013-2014
Teaching Staff Gan Na
Department/Section/Program of belonging The Faculty of Geography Resource Sciences
University/School Sichuan Normal University

Written statement, short description of the project in English, no more than 250 words

This design adjusts measures to local conditions with the theme of "surrounded by mountains and girdled by a river; Tao follows nature", which is intended to express the "Green Development" idea of "Lucid waters and lush mountains are invaluable assets" in order to implement sustainable development of water resources.

Based on Tianchi lake reservoir, the design considers natural vegetation as ecological background. It constructs a complex ecosystem with cleanliness, water-loving, naturalness. It then organically combines functionality of the reservoir and visually enjoyability of the lake, which highlights the design intent of "Looking up at the blue sky, leaning over to see the green water and pushing the window to enjoy the green scenery".

This design applies abstract techniques to refine the font style of "Tian (天)" of small seal script, a Chinese traditional character. Its function layout is based on the terraced terrain, which aims to achieve the landscape artistic conception of "Clear water and blue sky surrounded by mountains and girdled by a river".

This design combines mountains with water, forests with the plateau. It contains rich traditional Chinese feng shui —" Yin and Yang as Vital Forces " to achieve the harmonious development of human and nature.
