Written statement, short description of the project in English, no more than 250 words

La Plana is no longer what it was. The arrival of a new highway in the city of Valls has been the starting point of a reflection that goes from the landscape to the city. The dispersed and abandoned periphery calls for the attention of unselfish citizen. Fragmentation is the beginning of a territorial reading, which is set at a junction between roads. It's about sewing both sides of this wall. Thus, integrate it into the nearest environment, replanting local species and reusing the water as the dry land do.
