## TECHNICAL DOSSIER

Title of the project	<b>The Museum Of The Past</b>
Authors	Anita Rampetsreiter, Luca Lakatos, Susanna Dürr, Reka Bancsi
Title of the course	Design aspects in construction details (master study landscapearchitecture)
Academic year	winter term 2017/18, Exhibition Ponte de Lima 2018
Teaching Staff	Roland Wüick, Tutor: Angelika Lutz
Department/Section/Program of belonging	Department of Space, Landscape and Infrastructure Sciences (RALI) Institute of Landscapearchitecture (ILA)
University/School	University of Natural Resources and Life Sciences, BOKU Vienna

Written statement, short description of the project in English, no more than 250 words

The "Museum of the Past" was one of eleven winning projects of the 14th Garden Festival in Ponte de Lima (Portugal) with the topic "Climate in the Garden". The project views a drastic, but very likely to happen created environment, with which we want to make people aware of the current situation of our real natural environment.

All over the world natural habitats are declining in size, quality as well as quantity. It even might lead to a complete extinction of several habitats and shifts in climate zones. This trend of negative change relies on our non-sustainable lifestyle, which is orientated on consumption rather than prevention. Our project symbolises this worst-case scenario, that might happen to our blue planet. A world without any existing natural environments. Black soil, gravel and stones. Burned and cleared trees. No existing life. The once existing climate zones with their flourishing flora and fauna are now only visible in a museum given by the three domes - the unique chance to see the last 3 biomes of the ancient diverse climatezones. Each of the domes shows a different climate zone with their characteristic vegetation: desert, tropical rainforest and boreal forest. Let's visit it and show your children how it once looked!

The garden was exhibited in 2018 from may until october, maybe a reuse of the construction is possible to arrange.....

# CLIMATE CHANGE AGAIN

11th International Biennial Landscape Barcelona

Barcelona September 2020  
SCHOOL PRIZE

# THE MUSEUM OF THE PAST

**BOREAL FOREST**  
Northern Hemisphere 1 2150

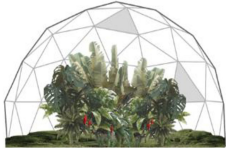

Ground layer with mosses, dried leaves + needles, pinecones and some small branches

Grey granite or gneiss rock

*Picea abies*  
*Pinus pumila* 'glaucá'  
*Alnus incana*  
*Vaccinium myrtillus*  
*Pinus mugo*  
*Vinca minor*  
*Festuca glauca*  
*Viburnum opulus*  
*Convallaria majalis*  
*Betula pubescens*  
*Betula pendula*

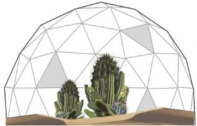

**TROPICAL FOREST**  
Southern Hemisphere 1 2087

Red soil with mosses and bark mulch

*Calathea zebrina*  
*Guzmania allura*  
*Blechnum brasiliense*  
*Monstera deliciosa*  
*Heliconia orthotricha*  
*Coffea sp.*  
*Alpinia purpurata*  
*Musa acuminata*  
*Anthurium andreaunum*  
*Trachycarpus fortunei*  
*Strelitzia reginae*  
*Salvia splendens*  
*Dieffenbachia sp.*  
*Hypophorbe verschaffeltii*  
*Ravenala madagascariensis*  
*Bromelia aechmea*  
*Colocasia esculenta*  
*Dypsis lutescens*

**DESERT**  
constant biome of the future

ochre coloured fine sand

*Echinocactus arusonii*  
*Cereus jamacaru*  
*Opuntia sp.*  
*Echinocactus platyacanthus*  
*Agave americana 'Marginata'*  
*Desert sandstone rock*  
*Carnegieia gigantea*  
*Pachycereus sp.*  
*Opuntia microdasys*

## VISUALS

## RECEPTION

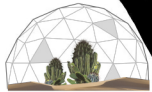

## THE IDEA

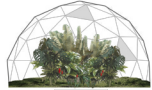

Romans remained enjoy the **luxury** of a modern and comfortable life. We have the opportunity to travel around the world, eat fruits from every continent and enjoy the **freedom** on the World Wide Web, but there are some basic elements needed to create and provide the history. There are all natural resources of our lands which are highly exploited. Rural areas are shrinking, specified habitats are becoming **endangered**, and if we do not take care of this changing behavior, our future environment could look like this garden.

Our land will be **dead**, polluted and **unfertile** and we will have to watch the last remains of our natural vegetation in a museum, separated from the outside world, so they are not getting contaminated and have a chance to survive.

## THE THREE DIFFERENT DOMES

DESERT

TROPICAL FOREST

MOUNTAIN FOREST
