TECHNICAL DOSSIER

Title of the project Bacatá Ecological Exhibition Park. PEECO Bacatá (by its acronym in Spanish)
Authors Luisa Fernanda Camelo Rojas / Juan Sebastián Niño De La Hoz / Miguelangel Pío Vives Gómez
Title of the course Landscape architecture: urban natures
Academic year 3rd
Teaching Staff José Javier Alayón González (Studio Director), Isabel Tobón, Sandra Caquimbo, Alejandro Serrano, Laura Mantilla and Javier Guerra (Advisors)
Department / Section / Program of belonging Department of Architecture / Architectural Design / Architecture Degree
University / School Pontificia Universidad Javeriana / Facultad de Arquitectura y Diseño

Written statement, short description of the project in English, no more than 250 words

The goal of this exercise is to design a park that will have an exhibition and recreational function, connected with the system of neighboring parks. The project must rescue the environmental memory of this site. The park is called Bacatá in homage to the original indigenous name of Bogotá when its savannah was dominated by wetlands.

PEECO must respond to the natural and social dynamics, respecting the railway line that crosses it. As an exhibition park, it is subject to intense spatial changes. On another time scale, the park must evolve in parallel to the fair and recreational activity.

In this work, the volumes of the buildings proposed, and the plant masses and bodies of water are addressed to the definition of urban spaces mixing nature and artifice. The result will contribute to the improvement of ecosystem services in the sector.
